

Let's remind ourselves of the story by looking at this summary.

1	Arthur was born in a small Icelandic town and it was clear from a young age that he was always going to be a bit different. He showed great interest in strange creatures and he would sit and listen to Atrix, the town's wise woman.
2	Arthur heard a terrible howl then a black shape bounded over him. Arthur clambered up the nearest tree and saw a monstrous black wolf heading straight for his town! He could only watch in horror as the wold put out the great fire.
3	All the townsfolk had been injured except Arthur. The townsfolk were angry and confused. They didn't believe that Arthur could help save the town when it was suggested that he could.
4	Arthur went to find Thor and Thor told him the only way to beat the beast was to find the sound of a cat's footfall and the roots of a mountain. Arthur went on his way to find these rare items. He made a cat jump by hitting it with a stick and collected the footfall. Next he climbed the world tree and collected the roots from the mountain.
5	Arthur returned to Thor and prepared what was needed to catch the terrifying wolf. They both battled hideous beasts along the way and finally arrived where the wolf was lurking. Arthur came up with a plan to cunningly trick the wolf. The wolf bit a fake hand which was actually the 'hand of time' which made him freeze and Thor and Arthur were able to catch and defeat the wolf.
6	As Arthur and Thor flew back to Arthur's frozen town, a lightning bolt crashed down from the clouds into the main square and the great fire burst into flames again causing the ice to melt once more! The townsfolk cheered and gathered to hear Thor speak about how Arthur had saved them. Arthur was already tucked up in bed fast asleep.
